Sixty-second session
Fourth Committee
Agenda item 40
Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples

Draft decision submitted by the Chairman

Question of Gibraltar

The General Assembly, recalling its decision 61/522 of 14 December 2006 and the statements agreed to by the Governments of Spain and the United Kingdom of Great Britain and Northern Ireland in Brussels, on 27 November 1984,[1] and in Madrid, on 27 October 2004, and noting the establishment, pursuant to the latter, of the tripartite Forum for Dialogue on Gibraltar, separate from the Brussels Process, under the statement made jointly by the Governments of Spain, the United Kingdom and Gibraltar on 16 December 2004:

(a) Urges both Governments, while listening to the interests and aspirations of Gibraltar, to reach, in the spirit of the statement of 27 November 1984, a definitive solution to the question of Gibraltar, in the light of relevant resolutions of the General Assembly and applicable principles, and in the spirit of the Charter of the United Nations;

(b) Welcomes the ongoing successful implementation of the first package of measures concluded at the tripartite Forum for Dialogue on Gibraltar.

Sixty-second session
Special Political and Decolonization Committee (Fourth Committee)
Agenda item 30
Effects of atomic radiation

Argentina, Armenia, Australia, Austria, Brunei, Darussalam, Canada, China, Costa Rica, Finland, France, Germany, Guatemala, Japan, Kazakhstan, Mexico, Peru, Poland, Russian Federation, Singapore, Sweden, Switzerland, Thailand and the United Kingdom of Great Britain and Northern Ireland: draft resolution

Effects of atomic radiation

The General Assembly,

Recalling its resolution 913 (X) of 3 December 1955, by which it established the United Nations Scientific Committee on the Effects of Atomic Radiation, and its subsequent resolutions on the subject, including resolution 61/109 of 14 December 2006, in which, inter alia, it requested the Scientific Committee to continue its work,

Taking note with appreciation of the work of the Scientific Committee, and of the release of its report on its fifty-fifth session,[1]

Reaffirming the desirability of the Scientific Committee continuing its work,

Concerned about the potentially harmful effects on present and future generations resulting from the levels of radiation to which mankind and the environment are exposed,

Noting the views expressed by Member States at its sixty-second session with regard to the work of the Scientific Committee,

Noting also the deep concern of the Scientific Committee that reliance on a single post at the Professional level in its secretariat has left the Committee seriously vulnerable and has hampered the efficient implementation of its approved programme of work,

[1] See *Official Records of the General Assembly, Sixty-second Session, Supplement No. 46* (A/62/46).

07-56333 (E) 261007

Conscious of the continuing need to examine and compile information about atomic and ionizing radiation and to analyse its effects on mankind and the environment,

1. *Commends* the United Nations Scientific Committee on the Effects of Atomic Radiation for the valuable contribution it has been making in the course of the past fifty-two years, since its inception, to wider knowledge and understanding of the levels, effects and risks of ionizing radiation, and for fulfilling its original mandate with scientific authority and independence of judgement;

2. *Reaffirms* the decision to maintain the present functions and independent role of the Scientific Committee;

3. *Requests* the Scientific Committee to continue its work, including its important activities to increase knowledge of the levels, effects and risks of ionizing radiation from all sources;

4. *Endorses* the intentions and plans of the Scientific Committee for completing its present programme of work of scientific review and assessment on behalf of the General Assembly and for developing a longer-term strategic plan for its work, and requests the Committee to submit plans for its future programme of work to the General Assembly at its sixty-third session;

5. *Requests* the Scientific Committee to continue at its next session the review of the important problems in the field of ionizing radiation and to report thereon to the General Assembly at its sixty-third session;

6. *Recalls* the intention of the Scientific Committee, expressed in paragraph 5 of its report to the sixty-first session of the General Assembly,[2] to clarify further the assessment of potential harm owing to chronic low-level exposures among large populations and also the attributability of health effects, and encourages the Committee to submit a report on that issue at its earliest convenience;

7. *Emphasizes* the need for the Scientific Committee to hold regular sessions on an annual basis so that its report can reflect the latest developments and findings in the field of ionizing radiation and thereby provide updated information for dissemination among all States, and endorses, on an exceptional basis, the intention of the Committee to convene its fifty-sixth session for seven days in order to finalize its next substantive report;

8. *Expresses* its appreciation for the assistance rendered to the Scientific Committee by Member States, the specialized agencies, the International Atomic Energy Agency and non-governmental organizations, and invites them to increase their cooperation in this field;

9. *Invites* the Scientific Committee to continue its consultations with scientists and experts from interested Member States in the process of preparing its future scientific reports, and requests the Secretariat to facilitate such consultations;

10. *Welcomes*, in this context, the readiness of Member States to provide the Scientific Committee with relevant information on the effects of ionizing radiation

in affected areas, and invites the Committee to analyse and give due consideration to such information, particularly in the light of its own findings;

11. *Invites* Member States, the organizations of the United Nations system and non-governmental organizations concerned to provide further relevant data about doses, effects and risks from various sources of radiation, which would greatly help in the preparation of future reports of the Scientific Committee to the General Assembly;

12. *Requests* the United Nations Environment Programme to continue providing support for the effective conduct of the work of the Scientific Committee and for the dissemination of its findings to the General Assembly, the scientific community and the public;

13. *Appeals* to the Secretary-General to take appropriate administrative measures so that the secretariat can adequately service the Scientific Committee in a predictable and sustainable manner and effectively facilitate the use of the invaluable expertise offered to the Committee by its members in order that the Committee may discharge the responsibilities and mandate entrusted to it by the General Assembly;

14. *Urges* the United Nations Environment Programme to review and strengthen the present funding of the Scientific Committee, pursuant to paragraph 13 of resolution 61/109, and to continue to seek out and consider temporary funding mechanisms to complement existing ones, and, in that context, takes note of the establishment by the Executive Director of the United Nations Environment Programme of a general trust fund to receive and manage voluntary contributions to support the work of the Scientific Committee, and encourages Member States to consider making voluntary contributions to the trust fund;

15. *Welcomes* the fact that Belarus, Finland, Pakistan, the Republic of Korea, Spain and Ukraine informed the President of the General Assembly before 28 February 2007, in accordance with resolution 61/109, of their desire to become members of the Scientific Committee, and invites each of those six Member States to designate one scientist to attend, as observers, the fifty-sixth session of the Committee;

16. *Requests* the Secretary-General to submit a comprehensive and consolidated report to the General Assembly at its sixty-third session, to be prepared in consultation with the Scientific Committee as appropriate, addressing the financial and administrative implications of increased Committee membership, staffing of the professional secretariat and methods to ensure sufficient, assured and predictable funding.
